

Title of the Challenge

Green Up! Cultivating Biodiversity and Sustainability in Service Centers Through Strategic Planting

What is the main issue the challenge addresses?

Underutilized Green Areas: The green spaces in our service centres are currently underutilized, primarily covered by grass, missing opportunities for enhanced water retention, carbon capture, and biodiversity support.

Call to Action

Join us in a transformative initiative that empowers you to make a real difference! We invite you to participate in the "Green Up! Cultivating Biodiversity and Sustainability in Service Centers Through Strategic Planting" project.

As part of our team, you will have the opportunity to:

- **Conduct Research:** Dive into the world of plant species and their environmental benefits.
- **Develop Strategies:** Create innovative ideas for using our green areas to capture water, reduce carbon emissions, and boost biodiversity.
- **Build a Business Case:** Collaborate to develop a compelling business case that demonstrates the value of sustainable planting practices.
- **Engage in Marketing:** Craft engaging marketing strategies to promote our green initiatives and inspire others. Your unique insights and creativity can help us unlock the full potential of our green spaces and drive meaningful environmental impact.

What is the desired impact of the challenge?

Environmental Restoration: Enhance local ecosystems by increasing biodiversity and improving soil health through strategic planting.

Carbon Sequestration: Significantly reduce carbon dioxide emissions by utilizing plant species that effectively capture CO₂.

Water Conservation: Improve water retention in our green areas, contributing to better water management and reducing runoff.

Community Awareness: Foster a culture of sustainability within our organization and the surrounding community by showcasing the benefits of green spaces.

Long-term Sustainability: Establish a framework for ongoing maintenance and development of green areas, ensuring continued environmental benefits over time.
