CURRENT PROBLEMS

Identifying the
Bulk Parts

Mistakes during
Assembling

Wrong Parts in
finished Product

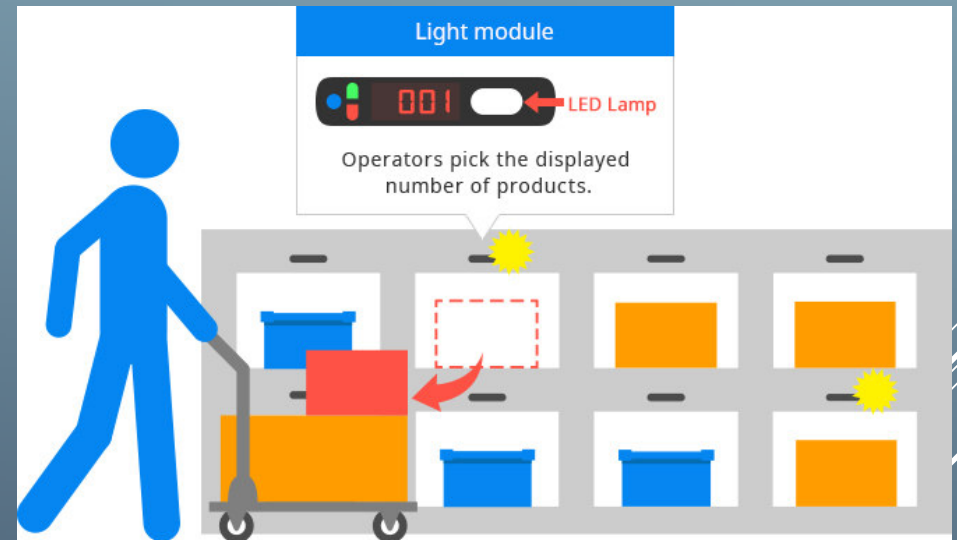

CURRENT ALTERNATIVES

ProGloves

Bulk Parts cannot be tracked

Pick-To-Light Devices

Many alternatives to choose from leads to wrong decisions

OUR SOLUTION

Sorting of Bulk Parts

Intelligent Bulk Parts Dispenser

Worker receives at each assembling step the right bulk part.
(+ validation with camera)

Instructing where to Assemble

Projection on to Assembly

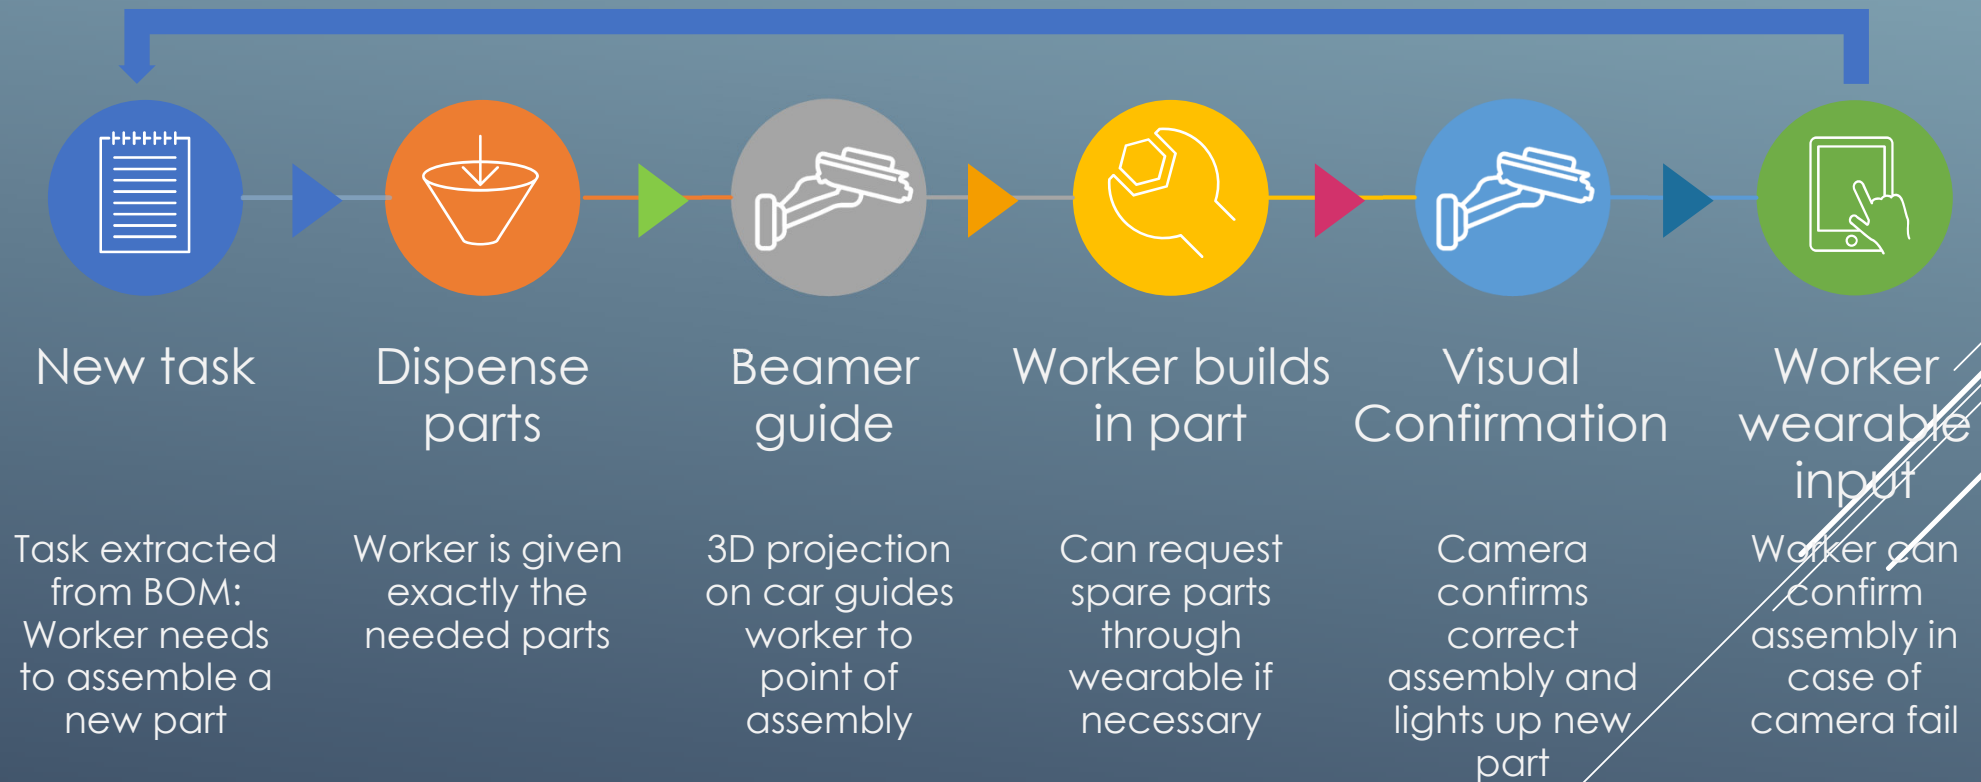

Project the location of where the bulk part should be mounted

Quality Check

Image Recognition

Detect if the piece was mounted at the right location

WORKING PROCESS

BENEFITS

Easy to
Implement

Low Cost

Facilitates
assembling
process

Reduces Errors
with Immediate
Feedback

Digital
Documentation
