Science Hack 2019

hosted by
TUM: Junge Akademie

The challenge

Big Data analysis for
visualizing GHG emissions

Professorship of Environmental Sensing and Modeling
TUM Department of Electrical and Computer Engineering
Technical University of Munich

The goal

- Understand bottom-up emission approaches
- Intuitively compare with measurements

Professorship of Environmental Sensing and Modeling
TUM Department of Electrical and Computer Engineering
Technical University of Munich

1,402,855,200

Datapoints in the inventories used

Our tasks

Display

The emission data on a dynamic world map

Select

Inventories, time points, specific areas and comparisons

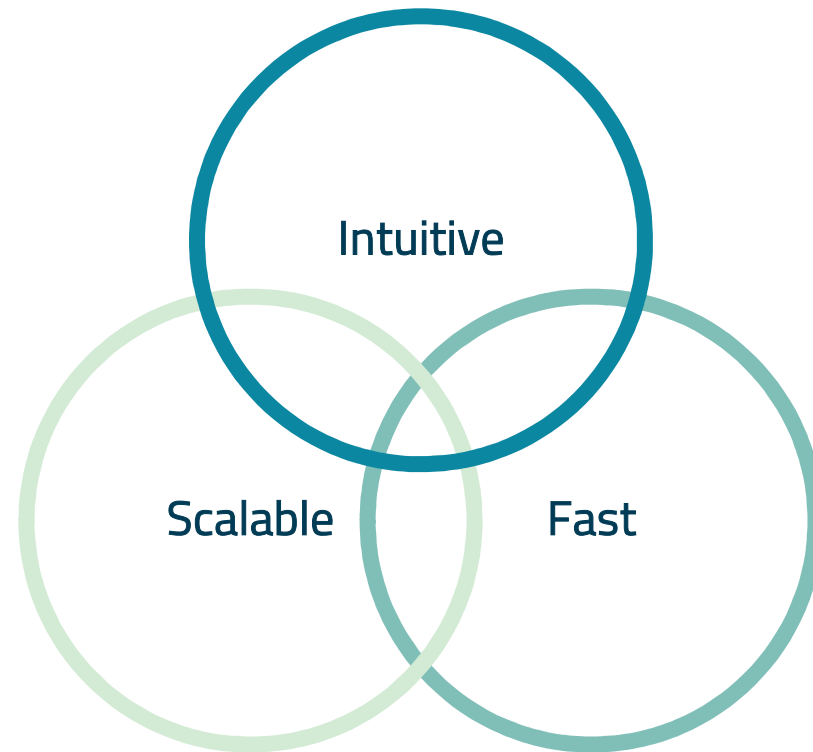

Export

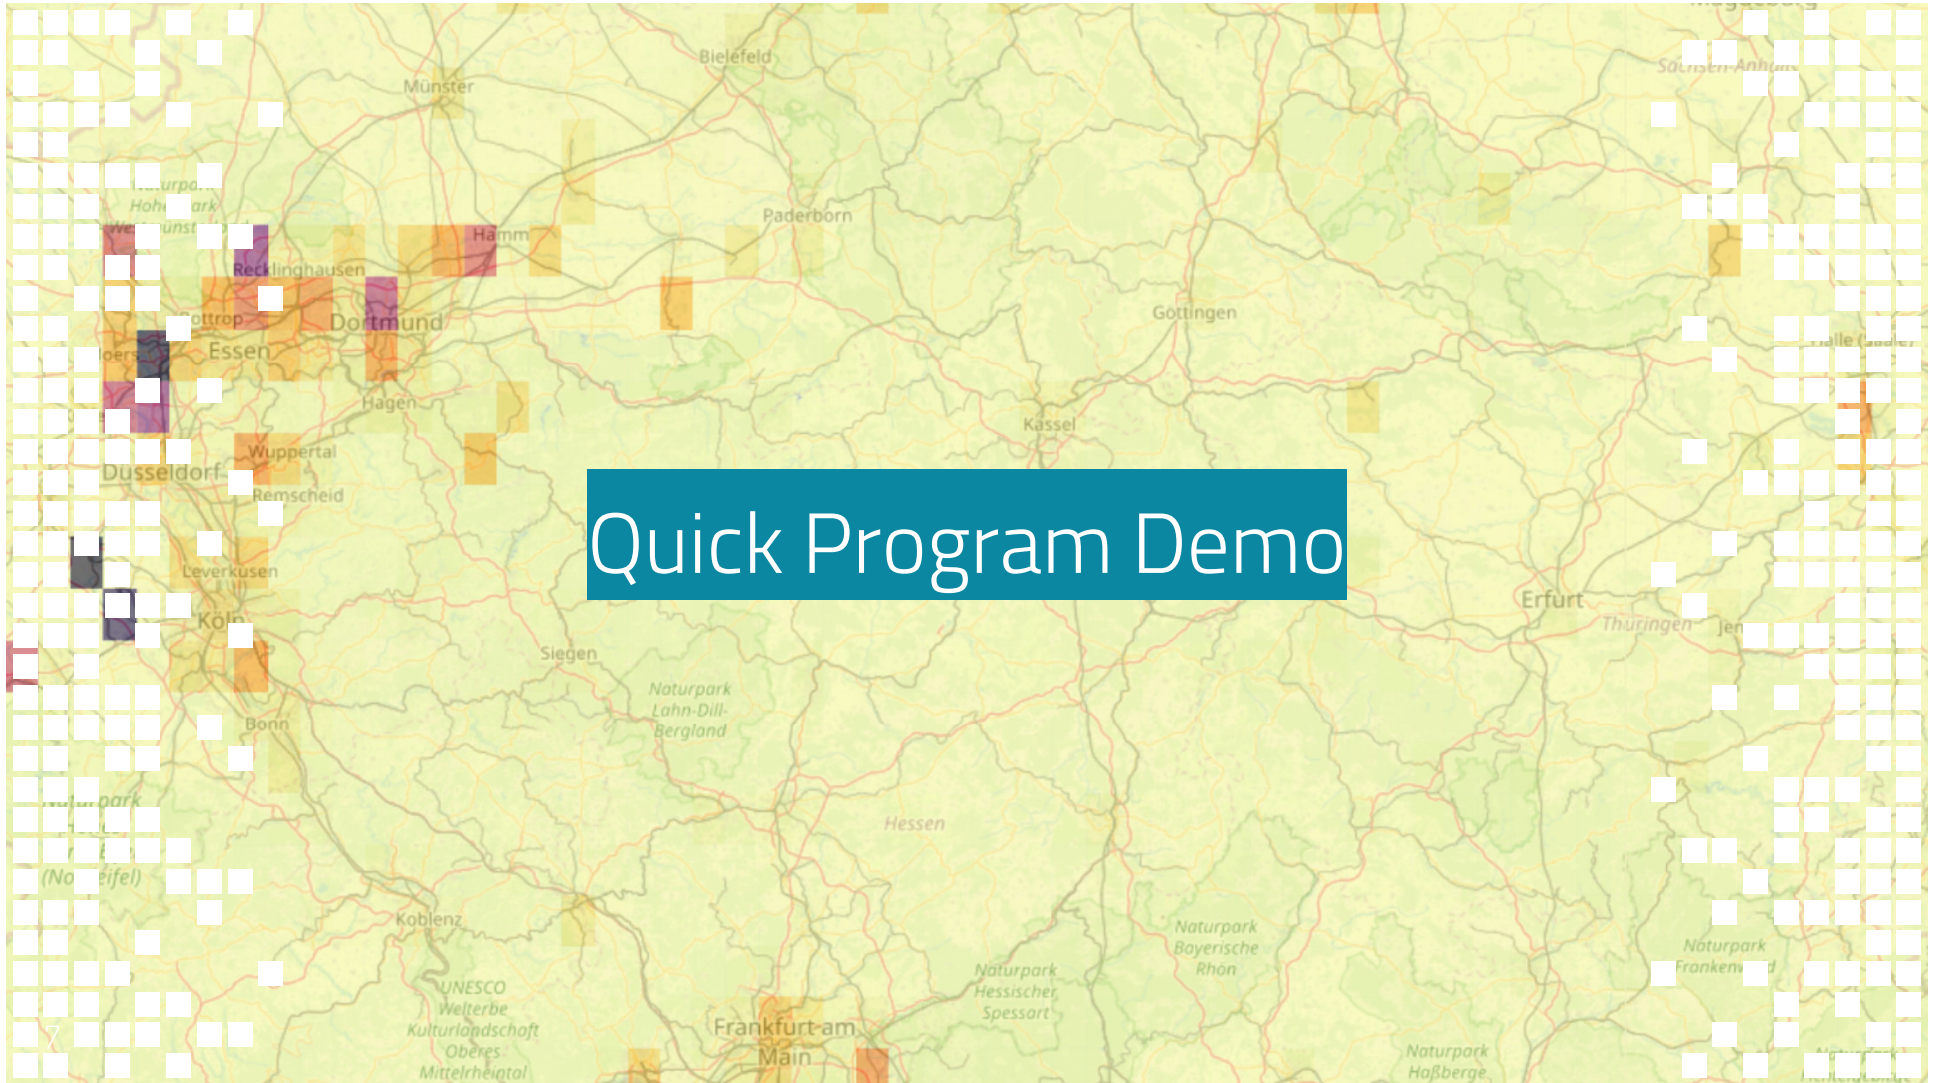

Emission data and comparisons into CVS files

Our vision

Quick Program Demo

Suggested future development

Thank you!

Any questions?
